1. Introduction

Background

The Olivehurst Public Utility District (District) initially formed a Mello-Roos Community Facilities District (CFD) to fund park maintenance in the Wheeler Ranch development in 2005. The North Plumas Lake CFD No. 2005-2 was formed by the District Board of Directors on September 15, 2005.

The District recognized that the portion of the assessment levied and collected by Yuba County (County) for County Service Area (CSA) 66 and designated for park maintenance was not sufficient to fully fund the cost of maintaining parks in Wheeler Ranch. The CFD was formed to provide additional funding to maintain parks in the event the CSA would not provide sufficient funding of park maintenance costs.

The District recognized that other new developments within its boundaries of the CSA would also face similar funding shortfalls, and, as such, required the annexation of certain new development projects into the CFD. The following development projects have been annexed into the CFD as separate “zones of benefit” (Zones):

- Wheeler Ranch
- Cobblestone Phase 2
- Village 16
- River Oaks East Phase 2
- River Oaks East Phase 3
- River Oaks North Village 1
- River Oaks North Village 2
- River Oaks South Village 1
- River Oaks South Village 2
- River Oaks South Village 3
- Draper Ranch North
- Thoroughbred Acres
- Feather Glen
- Plumas Ranch 134

The Wheeler Ranch Zone was originally levied a special tax under the CFD to date, as it is the only Zone currently benefiting from District parks. There are park maintenance funding shortfalls for these Zones under the CSA, so this levy under the CFD is being proposed to fund costs of park maintenance shortfalls for Fiscal Year (FY) 2023-24.

This report serves as the annual report for the purposes of levying the CFD special tax for FY 2023-24.

The Projects and CFD

The Wheeler Ranch Zone has an approved tentative map that would create 1,140 single-family residential units. Final maps have been recorded for Phase I of Wheeler Ranch, creating 665 single-family residential lots.

The Cobblestone Phase 2 Zone has a final map which has created 159 single-family residential lots. The Village 16 Zone has a final map which has created 155 single-family residential lots.

River Oaks East Phase 2 had a final map for 94 single-family residential lots and became taxable under the CFD for FY 2020-21.

River Oaks East Phase 3 (71 lots), River Oaks North Villages 1 and 2 (94 lots) River Oaks South Village 1 (83 lots), River Oaks South Village 2 (72 lots), and River Oaks South Village 3 (94 lots) has final maps recorded and will be taxable for FY 2021-22.

Thoroughbred Acres (158 lots), Draper Ranch North (98 lots), and Feather Glen (72 lots) will be taxable for Fiscal Year 2021-22.

Plumas Ranch 135 (171 lots) has final maps and will be taxable for Fiscal Year 2023-24.

The CFD is authorized to levy a special tax up to the maximum annual special tax to fund the costs of maintaining parks located in the CFD. This report will discuss the funding requirements for park maintenance in the CFD and then show the calculation of the required special tax levy for FY 2023-24.

Organization of this Report

This report serves as the Annual Tax Report required by the Mello-Roos Act. This report discusses parcels included in the CFD, the calculation of annual costs, and the allocation of the special tax to parcels. **Chapter 1** provides an introduction to the report.

Chapter 2 discusses CFD land uses. **Chapter 3** discusses annual CFD costs. **Chapter 4** discusses park maintenance revenues, the maximum annual special tax, and the special tax levy.

There is one exhibit attached to the report. **Exhibit A** contains the list of all CFD parcels and the proposed amount of special tax levy for FY 2023-24.

2. CFD Land Uses

The area included within the boundaries of the CFD consists of the following development projects:

- Wheeler Ranch
- Cobblestone Phase 2
- Village 16
- River Oaks East Phase 2
- River Oaks East Phase 3
- River Oaks North Village 1
- River Oaks North Village 2
- River Oaks South Village 1
- River Oaks South Village 2

3. Determination of Annual CFD Costs

Compute the Annual Costs of the CFD

The total annual costs for the CFD spread over the Zones are the total dollar amount of expenditure items that must be funded in FY 2023-24. The total annual costs for FY 2023-24 are \$200,450, as shown in **Table 2**. The annual costs for the CFD for FY 2022-23 were \$177,810.

Annual costs consist of the following items:

1. Park maintenance costs.
2. Administrative expenses.
3. LESS estimated revenues from CSA 66 assessment for park maintenance.

Park Maintenance Costs

Total estimated park maintenance costs for all Zones for FY 2023-24 are \$659,927. Estimated park maintenance costs consist of those services that were authorized in the formation documents for the CFD. Typical costs of the CFD are the salaries and benefits of employees performing park maintenance functions; costs for any contracts for services related to the maintenance of parks; purchase, maintenance, and replacement of equipment required to maintain parks; and utility costs.

Administrative Expenses

The District may levy special taxes to cover administrative expenses associated with the costs of administering the CFD. Administrative costs consist of, but are not limited to, District staff costs, tax administrator costs, legal fees, and County special tax collection fees. Total administrative expenses of the CFD are estimated to be \$9,500 for FY 2023-24.

Less CSA 66 Revenues

The CFD was formed to provide additional funding for park maintenance where CSA 66 does not provide sufficient funding for proper maintenance of park facilities. It is estimated that CSA 66 will generate \$449,977 in revenue for park maintenance. This will be discussed further in the next chapter.

Total Estimated Annual CFD Costs for FY 2023-24

Total estimated annual CFD costs for FY 2023-24 are total park maintenance costs, plus administrative costs, *LESS* estimated CSA 66 revenue. The net amount for CFD annual costs for FY 2023-24 is \$200,450. This is the amount that must be levied under the CFD to provide supplemental revenue to fully fund the costs of park maintenance.

[1] This is the estimated CSA 66 revenue from **Table 3**.

[2] The Special Tax Formula stipulates that the annual special tax levy for the CFD is determined by estimating total maintenance costs, then subtracting estimated revenue to be generated by CSA 66 for the zone. The net result is the amount of annual CFD costs that must be funded through the levy of the special tax under the CFD.

4. Park Maintenance Revenues, Maximum Annual Special Tax, and Special Tax Levy

This chapter will discuss the estimated CSA 66 assessment for park maintenance for FY 2023-24, the maximum annual special tax of the CFD for FY 2023-24, and the calculation of the annual special tax levy for FY 2023-24 based on the CFD costs discussed in the previous chapter.

Estimated CSA 66 Revenue

The Engineer's Report for CSA 66 from February 3, 2004, established an assessment to fund the costs of providing services to developing areas in Plumas Lake. The assessment funded the cost of maintaining roads, landscaping, streetlights, parks, drainage, and soundwalls. The assessment also funded fire protection services. In the base year of 2004, the portion of the assessment that was allocated to park maintenance was \$126.67 per parcel. The Engineer's Report stipulated that the park assessment would be increased by the Consumer Price Index (CPI) San Francisco CPI, All Urban Consumers in each year thereafter.

Table 3 shows the FY 2022-23 assessment for park maintenance in CSA 66 of \$198.62. CPI has increased 8.4 percent in 2022. Applying this increase in CPI to the FY 2022-23 assessment of \$198.62 results in a \$215.30 per unit assessment for park maintenance for FY 2023-24.

There are 2,090 developed parcels in CSA 66 that are also in the boundaries of the CFD. Therefore, the total estimated revenue from CSA 66 for park maintenance in FY 2023-24 is \$449,977 (see **Table 3**). This amount is used to reduce the amount required for park maintenance in **Table 2**.

Annual Escalation Factor for the Maximum Annual Special Tax

The Special Tax Formula instructs the administrator of the CFD to increase the maximum annual special tax by the greater of the three indices listed below:

- CPI, San Francisco CPI, All Urban Consumers.
- CPI, San Francisco CPI, Urban Wage Earners.
- CPI, Pacific West Cities CPI, Urban Wage Earners.

The base year for the CFD was FY 2004-05. **Table 4** shows the annual CPI increase for the maximum annual special tax based on the above-referenced criteria.

[1] The Special Tax Formula states that the maximum annual special tax is increased annually by the greater increase in the three indices shown.

Source: State of California Division of Labor Statistics & Research.

Increase of the Maximum Annual Special Tax by the Tax Escalation Factor

The base year maximum annual special tax for the CFD was \$220 for a single-family residential lot. Increasing the base maximum annual special tax by the tax escalation factors shown in **Table 5** provides the maximum annual special taxes for each fiscal year from the base year. The maximum annual special tax for a developed parcel is \$385.13 for FY 2023-24. The combined levy of the CSA 66 assessment AND the CFD may not exceed this amount, according to the Special Tax Formula. If the County were not to collect the full authorized amount of park assessment under CSA 66 in any fiscal year, the District could increase the amount of the CFD special tax levy up to the maximum annual special tax calculated for that given fiscal year to fully fund park maintenance costs.

Compute the Special Tax Levy for FY 2023-24

The Special Tax Formula instructs the administrator to first determine the annual costs of the CFD. The estimated annual costs of the CFD (as shown in **Table 2**) are \$200,450. The amount of special tax that can be collected by levying the special tax up to the maximum rate will equal the amount of annual costs shown in **Table 2**. **Table 2** shows the maximum annual special tax revenue from the 2,090 developed parcels in the CFD is \$804,921.70. This amount comes from **Table 6**. The annual CFD costs will result in developed parcels in the Wheeler Ranch Zone being levied at 33.75 percent of the maximum annual special tax. Developed parcels in the remaining Zones will be levied at 20.77 percent of the maximum annual special tax from developed parcels. Therefore, only developed parcels will be assigned the special tax levy, as the maximum special tax revenue from developed parcels is greater than the annual CFD costs. If the annual CFD costs were greater than the maximum special tax revenue from developed parcels, the District could levy a special tax on undeveloped parcels.

Applying the approximately 33.75 percent and 20.77 percent factors to the maximum annual special tax of \$385.13 generates a special tax levy requirement of \$130.00 for the Wheeler Ranch Zone and \$90.00 for all remaining Zones (as shown in **Table 6**) per developed parcel for FY 2023-24.
