

Olivehurst Public Utility District

Committee Staff Report

Meeting Date: June 4, 2019

Item description/summary:

Surplus of Apparatus: The department has two apparatus that would like to surplus. One is a 1997 HME Fire Engine (E312). E312 fire truck has been in service for 22years. This March the Engine motor seized. The engine has depreciated well past it life Expectancy of a first out fire truck. After review and discussion with finance manager we fill the best thing is to surplus the engine. The second apparatus is a 2004 Chevy Tahoe. This vehicle was used in the past as the command vehicle. We currently do not have a use for the vehicle. It currently sits' and has not been used. The Tahoe has over 100,000 mile on it. I recommend that we use FIRETRUCK UNLIMITED to surplus the apparatus. The company has two options to offer. One is buy the apparatus them self, or to list the apparatus as a third party seller.

Fiscal Analysis:

FIRETRUCK UNLIMITED has a 10% service charge on the total sale.

Employee Feedback

Sample Motion:

Move to full board
