

Olivehurst Public Utility District

Agenda Item Staff Report

Meeting Date: 10/21

Item description/summary:

NEW TABLETS FOR INSPECTION ON-SITE PURPOSES: It has come to my attention, OPUD is currently monitoring multiple different construction sites and don't have a way to quickly bring up plans to review what is exactly happening on site without unfolding and caring multiple plans with them at all times. On average, staff inspectors can visit over 10 different sites across all of the service district and in most cases, there in different locations with no reliable communications between plans and documents. In my few weeks on staff, I've seen staff having to go back to the office to capture plans to review when discussing with contractors or having to look over contractor shoulder to see what their plans show. By buying a minimum of two tablets, it allows myself and the site inspectors (Dan Nielsen and Jon Phillips) to bring up plans within a tablet, have it connected to our system Database and bring up any site plans at anytime, mark up any deficiencies we notice on site, make comments regarding what were seeing on site, take notes, review plans, take pictures and write directly on them while its fresh in our memory, etc. For example, In terms of a situation where there is a leak and we need to identify information of the site, the tablets would allow us to locate the site and be able in dig up any information necessary to assist in the process to expedite the repairs needed. The portable smart tablets are a very important resource and tool that many inspectors/engineers use during construction phase and implementing compliance. I have conducted research and have found two viable options that will allow us to better serve during construction review and streamline the process and make it more efficient as possible.

- 1.) Galaxy Tab Active2 8.0" 32GB (Unlocked) - \$565**
- 2.) Galaxy Tab Active Pro 10.1" 64GB (Unlocked) - \$580**

Additional research will be conducted for other possible options, but these are the two options being looked at in the moment and the link to there location is below. Attached I've also included the spec sheets/information on specific devices.

<https://www.samsung.com/us/business/mobile/tablets/galaxy-tab-active/>

At a minimum, the selected device must have the following programs accessibility/compatibility within the device:

1. Bluebeam
2. Adobe
3. Cad Reader
4. Office 365
5. Device needs to be able to be adapted for mobile hot spot

At a glance

Go fearlessly. Work seamlessly. Strong from the inside out, the Galaxy Tab Active2 is a rugged tablet designed to withstand harsh conditions and equipped with the latest digital workflow tools to maximize operational efficiency. It's ideal for industries like asset management, retail, transportation, manufacturing, field service and public safety.

Strong from the inside out with a durable tablet design passing military specification MIL-STD 810G and IP68-certified*

Seamless workflow thanks to LTE capability, innovative features and an ecosystem of partner solutions for industry-specific needs.

Water-resistant† 5. Pen and screen for note-taking in inclement weather, plus Glow mode and facial recognition for working with protected hands.

IT-friendly with defense-grade security plus a fingerprint scanner for biometric authentication and services that make IT management easy.

Features

Take on everything

The Galaxy Tab Active2 was subjected to 21 rigorous tests for MIL-STD 810G certification, and it passed them all: drops, shocks and vibrations, high/low temperatures and humidity, and even high altitudes. Your team can take this rugged tablet just about anywhere—because it's as tough as they are.¹

Conquer the Elements

With an IP68 rating, this tough tablet is water- and dust-resistant, so your team can use it worry-free, anywhere. It can even survive for a half-hour in five-foot-deep water, and keep right on working.²

Just grip it and go

This ruggedized tablet comes with a water-resistant S Pen³ that makes working more intuitive. The S Pen looks and feels like a typical pen but allows your team members to easily jot down digital notes, sketch ideas or capture signatures without missing a beat.

Always in its element

With the Galaxy Tab Active2's Enhanced Touch options, water and protective gear don't get in the way. Rain and snow simply roll off the water-resistant screen* and Glove mode makes things easy for protected hands.

A productive new reality

Equipped with tracking tools—including an accelerometer, gyroscope, GPS and a geomagnetic sensor—the Galaxy Tab Active2 can be loaded with third-party applications that let you deploy your team for easier in-field asset management and quicker equipment inspections. With augmented reality (AR) capabilities, your team is smarter and faster.

A connection that lasts

The heavy-duty POGO Pin connector means rock-solid dependability. Use it to quickly connect and charge a group of devices all at once, or to easily attach a laptop keyboard. The rugged POGO Pin makes it easier for your team to get it all done. See an example with the Portwell® Multi-Get Dock.

Stronger, longer charge

This durable tablet's long-lasting battery keeps your team connected up to 11 hours.* And when it's time, the Galaxy Tab Active2's battery can be easily replaced right in the field for another 11 hours of use. Just load a fully charged battery into a field pack and power on.

LTE makes it seamless

No matter where your team is working, the Galaxy Tab Active2 keeps them connected. Its LTE connectivity takes over when there's no available Wi-Fi, so your team can always maintain peak productivity.*

Make it right for your team

The Galaxy Tab Active2 works seamlessly with an ecosystem of partners so you can equip your tablets for the way your team gets business done. With an array of third-party software, apps and hardware accessories like rugged tablet cases, adapters and vehicle mounts, the Galaxy Tab Active2 can become virtually customized for any workforce.

**ATTACHMENT 2 - Galaxy Tab Active Pro 10.1" 64GB
(Unlocked)**

Go fearlessly. Work seamlessly.

The rugged Galaxy Tab Active Pro. Bringing seamless workflow to industrial environments.

Presenting the newest member of our rugged team. The MIL-STD-810G-certified¹ and IP68-rated² Galaxy Tab Active Pro, along with the IP68-rated² S Pen, mean your team will be productive regardless of the environment or weather. The Galaxy Tab Active Pro features a large 10.1" screen, for easier visibility and functionality, even with gloved hands.³ Samsung DeX⁴ lets you create a desktop experience no matter where you are. And with LTE, your team will always be connected.

Key Features

Purpose Built

Get more done, effortlessly. With the MIL-STD-810G¹ and IP68-rated² Tab Active Pro, plus IP68-rated² S Pen, you can work effectively no matter the conditions.

Always in its element. Tackle any situation easily with the field-ready 10.1" Tab Active Pro. With enhanced touch and glove touch capabilities,³ Tab Active Pro will react to you and your conditions, not the other way around.

Power for hours. With up to 15 hours on a full charge⁵, you can create, edit and collaborate all day. And if the job's still not done, simply swap in a fresh battery.

Seamless Workflow

Mobile multi-tasking with Samsung DeX. Samsung DeX⁴ turns the Galaxy Tab Active Pro into a PC that you can carry around easily, with the ability to toggle between apps and stay connected. An ecosystem of third-party peripherals further transform the Tab Active Pro into a powerful desktop-like experience.

Work that doesn't stop. Use the POGO Pin connector to quickly connect and charge, or to easily attach a keyboard or any number of third-party peripherals.

Customize your quick access. With the new programmable button, you can now pick and choose which business applications to instantly access.

Working has never been so easy. The NFC-capable Galaxy Tab Active Pro allows you to access production information in real time, while monitoring and managing team and machine usage all at once. And since it's mPOS-ready,⁶ you can now accept payments without any additional hardware necessary.

Always connected. Wireless data networks are now faster than ever, with LTE ensuring high-speed connectivity all the time. Always working, always connected.

Compliant and Secure

Knox Services mobile security and management. Cloud-based services let you enroll, configure and manage hundreds of devices as if they were one.

Business Services give you complete control. Enterprise Firmware Over-The-Air (E-FOTA) enables remote updates and control over firmware and OS updates.⁷ ProCare delivers mobility technical support, from escalation to development.⁸ And QuickStart gets you quickly managing, configuring and deploying apps.⁹

Defense-grade Knox security. Knox is built from the chip up for superior protection that's easier to manage.¹⁰
