

Plumas Lake Little League Request

We want to remove the top 1-2 inches of dirt from the ball fields and replace it with new dirt. The current dirt is rocky and is causing injuries (cuts and scrapes) to the kids while they are playing baseball.

The company we are looking at buying the dirt from is Cascade rock inc in Sacramento. They have a dirt mix that is designed for sports fields.

With the delivery of the dirt, we will likely need to have it dropped in the south parking lot (hidden creek way) and trailer it over with wheel barrows and trailers on quads and lawnmowers. We will be sure to clean the parking lot to ensure a mess is not left behind. If there is anything that needs to drive on the grass it may be a pickup truck and we will limit the amount that we drive on it.

We would like to get the work done in December and January prior to our spring season starting.

Sorry for the late response. Let me know if there is any other Information needed.

Andrew
